Ozaukee County Goes Live with ProPhoenix Public Safety Software

Ozaukee County, WI – June, 6, 2011 The Ozaukee County Sheriff's Department flipped the switch to release the live Phoenix software suite to fulfill their public safety needs. Home to a population of 87,000 residents and 215 sworn officers, Ozaukee County is now utilizing Phoenix Computer Aided Dispatch, Law Enforcement Records Management, WDA Mobile, Citizen Services Program (CSP), and soon, Corrections Management Software.

Eight Police Departments and the Ozaukee County Sheriff's Office are now empowered to work together and share information through a Multi-Juris configuration and the use of ProPhoenix's Key Global Information System. The integration of the Phoenix software suite will greatly benefit the Police officers with a central repository of information and tools which include everything the officers need to "serve and protect." Through the CSP website, citizens of Ozaukee County will have access to information such as crime statistics, crime reporting, accident report downloads, and road closure information.
